REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

While the German Patent DE 19952919 and the German book reference cited in the first office action disclose most all the features of applicant's instant invention as set forth therein, the examiner now concurs, pursuant to applicant's remarks in his response filed November 14, 2006, that neither of these references taken either alone or in combination disclose or fairly teach that the first annular flange is formed from an outer edge region of the sheet bar. As alluded to in applicant's remarks, applicant's specification provides clear reasoning for forming the first annular flange in this manner, in particular to bring about a material consolidation in the outer edge region of the sheet bar and in the finished spring pot in the region of the first annular flange that serves for fastening of the spring concertina. Neither the '919 patent or the German book reference teach or fairly suggest this feature of the claims.

It is for this reason that applicant's invention defines over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
